

GEAR AND EQUIPMENT LIST

ABOUT GEAR AND EQUIPMENT

SLS CLUBS AND SERVICES

Any gear and equipment used by SLSA affiliated clubs and services for the purposes of frontline surf lifesaving must be endorsed by SLSA and listed in this document.

This is to ensure that members are using equipment that is of the highest industry standard, fulfils operational requirements, and is safe to use.

SLSA affiliated clubs and services using equipment that is not endorsed and listed as approved should be aware that they may be susceptible to any possible insurance and litigation issues resulting from an incident.

This list is current as of the **23 October 2024**

SUPPLIERS AND MANUFACTURERS

Any new or modified gear and equipment that is to be used for frontline lifesaving operations may undergo an evaluation process.

These evaluations are to ensure the equipment is of the highest industry standard, fit for purpose, and does not present any intolerable secondary risk to members.

No officer, member, supplier or manufacturer has the authority to change specifications, introduce rescue equipment or modify existing approved rescue equipment without the written approval of the SLSA.

Suppliers or manufacturers wishing to have their equipment evaluated by SLSA should contact the SLSA Coastal Safety Team.
