SLSQ Volunteer Procedure

Subject: Surf Sports SRR Procedure	**Department: Surf Sports**
Procedure No: SR37	**Version No: 1**
Effective Date: 1st September 2026	**Revision Date: 1st August 2028**

Purpose

The Surf Risk Rating application must be applied to all Surf Sports training sessions with coaches completing the Surf Risk Rating prior to commencing the training session. It is also advisable for the coach to complete a secondary SRR if an injury or incident occurs during the training session as conditions may change during the training.

The Surf Risk Rating, whilst currently still available through the SLSA operations App has now been included into LIMSOC, so that coaches when logging on a training session can complete the SRR within LIMSOC without pre-completing the SRR in the SLSA Ops Manual. SLSA is reviewing the SLSA Operations App and the location of the Surf Risk Rating component which will be moved over the coming months.

Completing the SRR and logging training session in LIMSOC allows for stronger risk management across clubs and for the awareness of the SOCC to manage any possible incident that may occur or may require the assistance of a nearby training session. This procedure has been developed to assist coaches and clubs navigate what is required as SLSQ is aware that LIMSOC will be new for most coaches.

Scope

This procedure applies to all SLSQ surf sports coaches whether in a voluntary capacity or professional capacity.

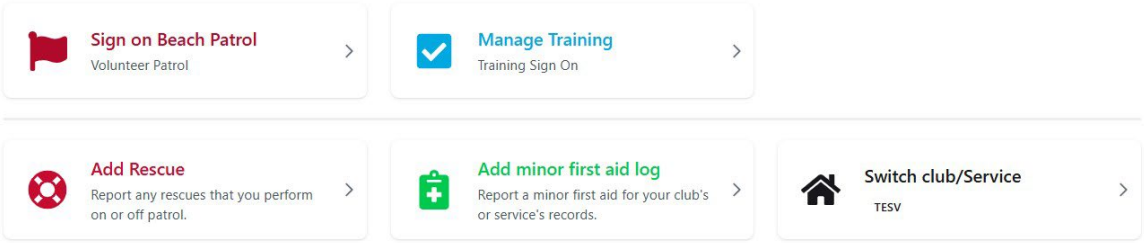
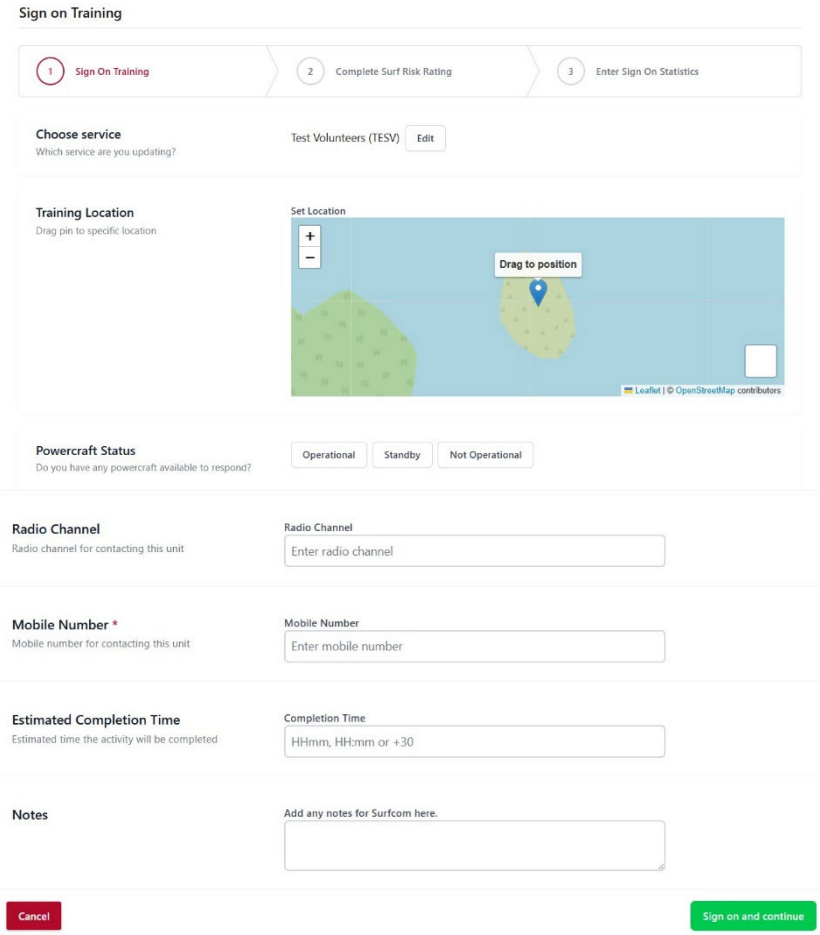
Procedure

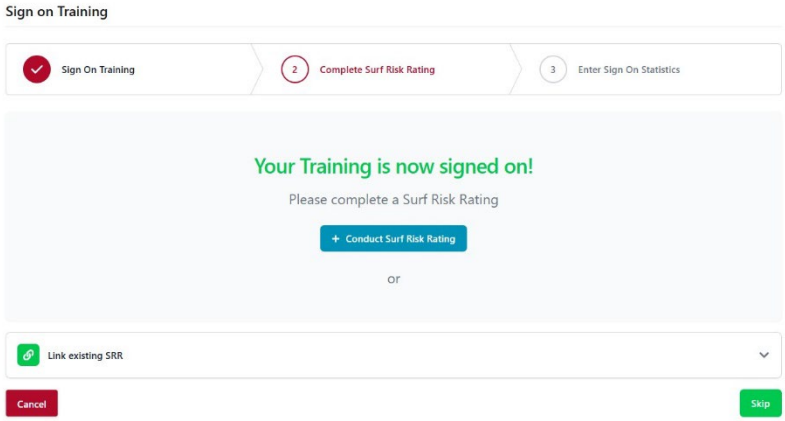
1. Before the start of the training, the coach must sign into Limsoc and complete the SRR. Sign into Limsoc, select the relevant club and select Sign on Manage Training.



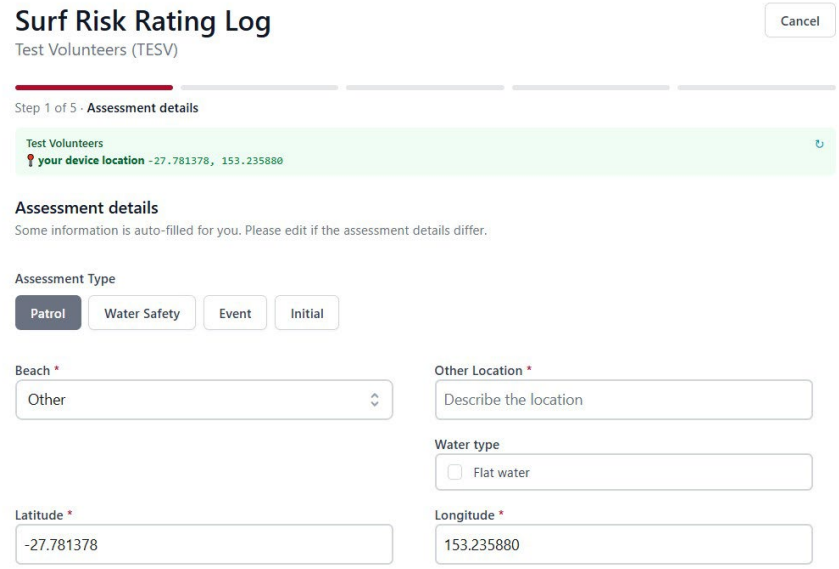
2. Enter all required details and once filled in select Sign on and Continue.



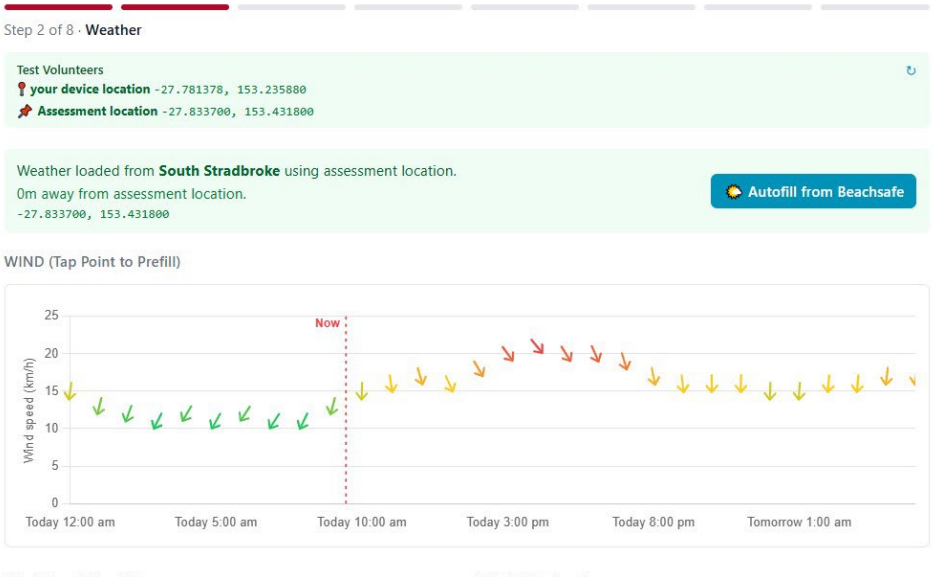
3. Now that the training has been signed on, the SRR can be completed. Begin by selecting Conduct Surf Risk Rating.

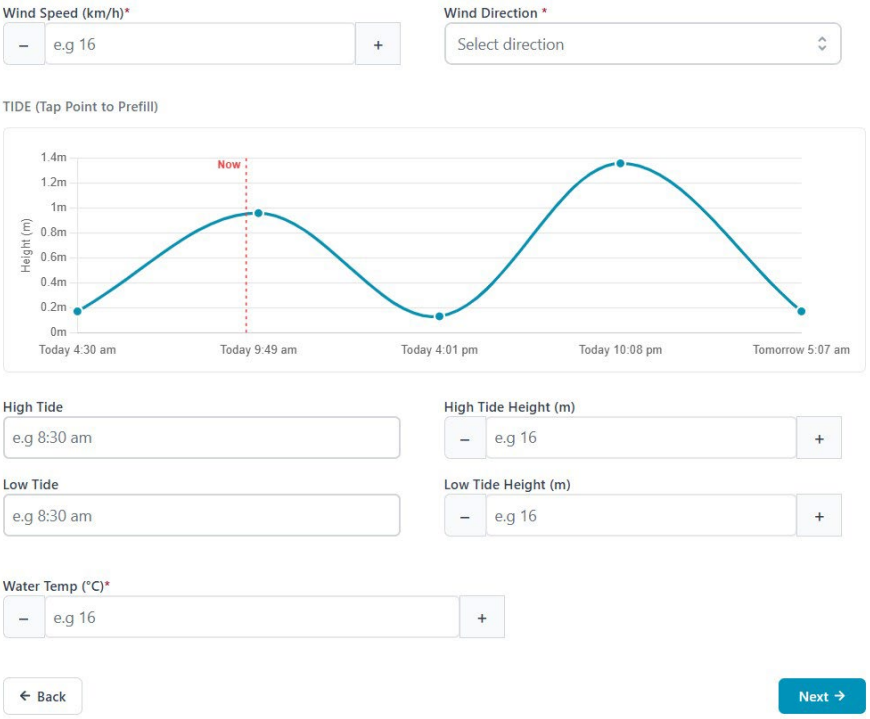


4. Enter the relevant assessment details and select Next.

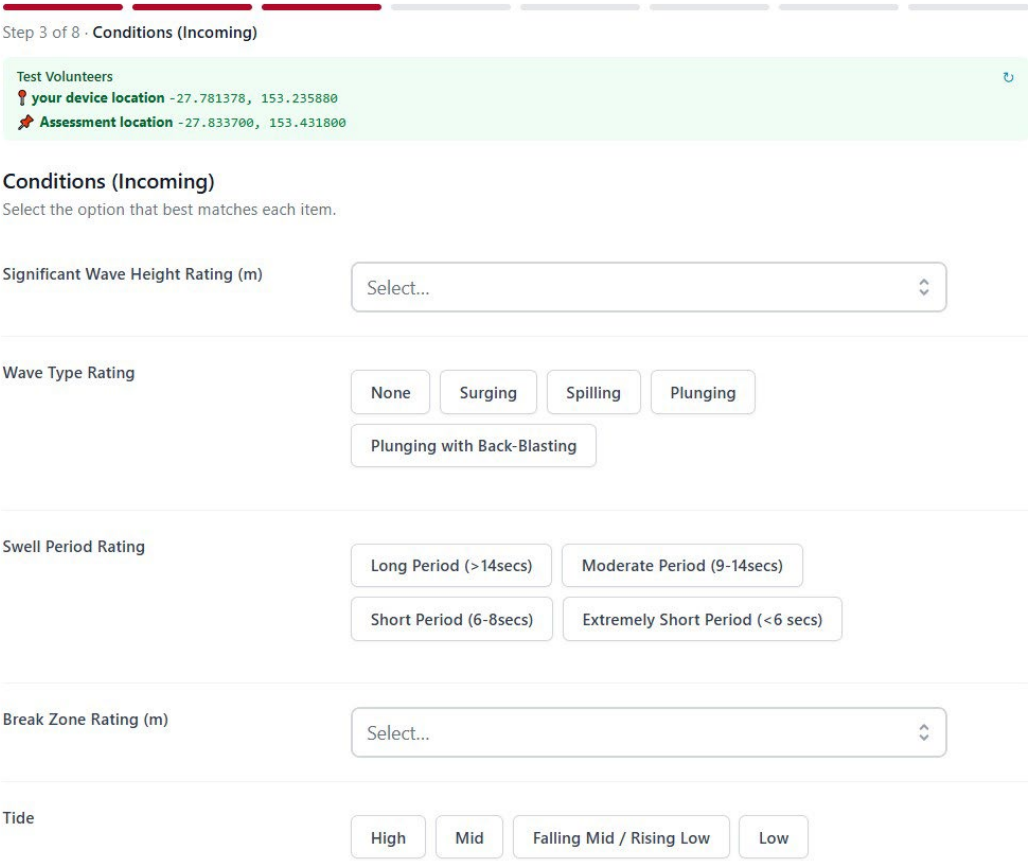


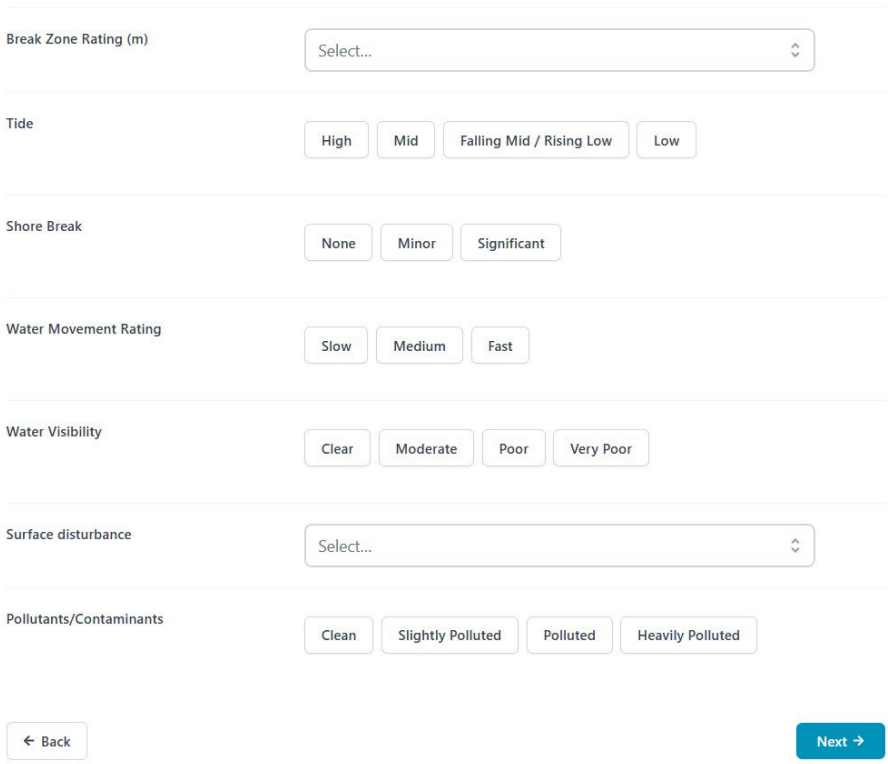
5. Enter the weather details by selecting Autofill from Beachsafe and select next.



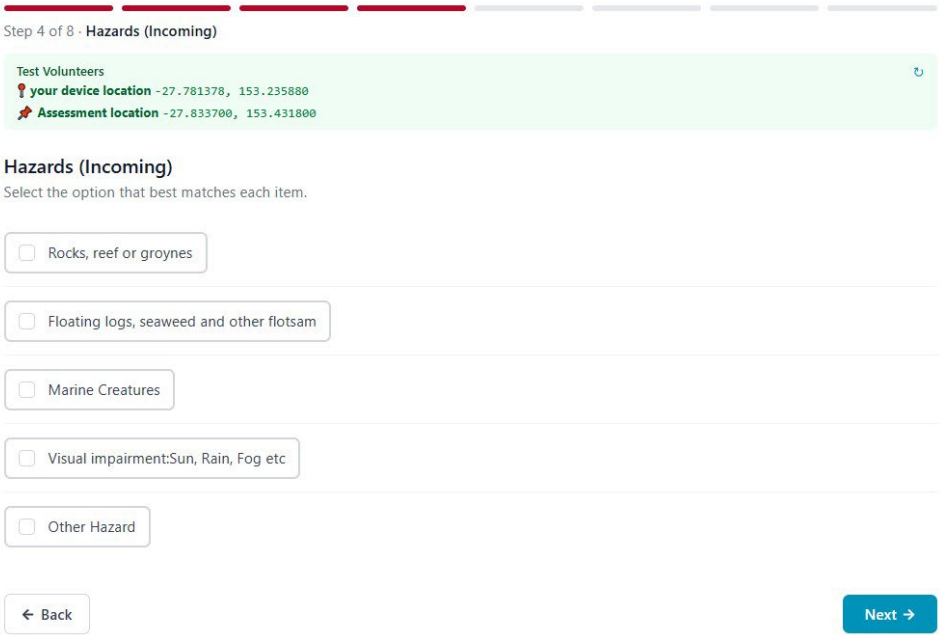


6. Enter the incoming conditions and select next.

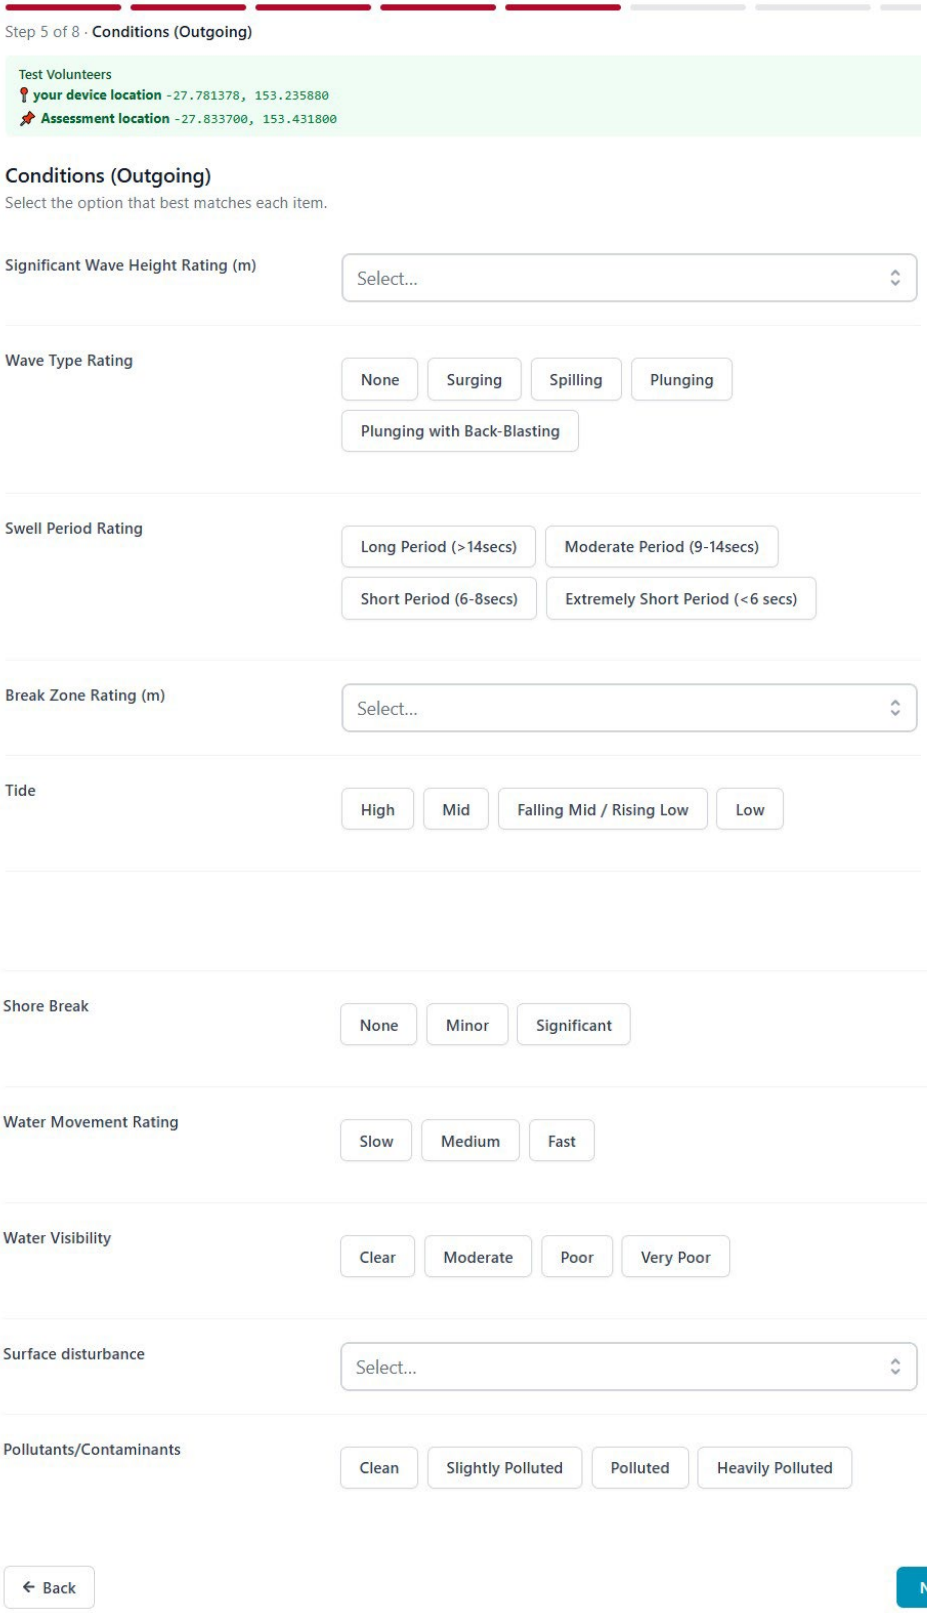




7. Enter the incoming hazards (if any) and select next.



8. Enter the outgoing conditions and select next.



9. The SRR should now be generated and the training can begin.
10. Once training is complete please go back into LIMSOC and sign off training.
